

Brand & Design Style Guide

The human-readable reference for design audits across CustomGPT.ai pages. Colors, type, components, and the non-negotiable rules every page must follow.

00 The Two Hard Rules

These override everything. If a design breaks either rule, it is off-brand.

SHADOW Always no shadow. Nothing on the site casts a shadow.	RADIUS Always no radius. Square corners everywhere.
--	---

01 Color Palette

Every color on the site maps to a token below. Any hex not listed here requires operator approval before use.

BRAND — PRIMARY

	
Primary Indigo #7367F0 --color-primary Buttons, links, step numbers, icon strokes	Primary Hover #5A52D4 --color-primary-hover Button hover state

PURPLE

Purple

#7C3AED

--color-purple

Eyebrows, italic accent, stat values, citation badges

PINK

Pink

#EE55FF

--color-pink

Pink Hover

#D93EEA

--color-pink-hover

BACKGROUNDS

Page Base

#FAF9F6

--color-bg

Warm off-white — page background

Neutral

#F0EDE6

--color-bg-neutral

Secondary cards, step cards

Dark

#0A0A1A

--color-bg-dark

Security, final CTA sections

TEXT — 2 LEVELS ONLY

Text

#111827

--color-text

All primary: headlines, body, card text

Text Muted

#4B5563

--color-text-muted

All secondary: labels, captions, support copy

BORDERS

Border

#B8B2A8

--color-border

Standard — warm tan. The default border everywhere.

Border Soft

#EDE9FE

--color-border-soft

Soft lavender (light bg only, rare)

02 Typography

Two families only. **Lora** (serif) for all headings & quotes; **Inter** (sans) for everything else. Headings always use the `.h1` / `.h2` / `.h3` classes — never a custom font-size-only class.

H1 • Page heading
Lora 700 • clamp 38–58px • line 1.08

Build AI agents fast

H2 • Section heading
Lora 700 • clamp 28–44px • line 1.1

Why teams choose us

H3 • Subsection
Lora 600 • clamp 17–22px • line 1.25

A faster way to deploy

Eyebrow
Inter 700 • 13px • UPPERCASE • indigo • tracking .08em

SECTION LABEL

Lead / subheadline
Inter 400 • clamp 16–20px • muted • line 1.65

Supporting description that sits under a heading. One or two sentences.

Block quote / testimonial
Lora 400 • clamp 17–21px • *italic*

It cut our support volume in half within two weeks.

Display stat value
Lora 700 • clamp 36–52px • indigo

88%

Display price number
Inter 900 • clamp 32–42px

\$99

Body text
Inter 400 • 16px • line 1.6

Standard body copy. Inter regular at the base body size, used for paragraphs and card descriptions.

Microcopy / friction
Inter 400 • 11px • muted

7-day free trial • Cancel anytime

Type scale (body & UI sizes)

TOKEN	SIZE	USE
--text-xs	11px	Timestamps, smallest labels, friction microcopy
--text-sm	12px	Badges, meta, secondary roles

--text-ui	13px	UI text, small buttons, captions, eyebrows
--text-base	14px	Card body, feature descriptions
--text-md	15px	List items, base button text
--text-body	16px	Page body base
--text-lg	18px	Section subtitles, hero button text
--text-xl	20px	Hero description, stat values

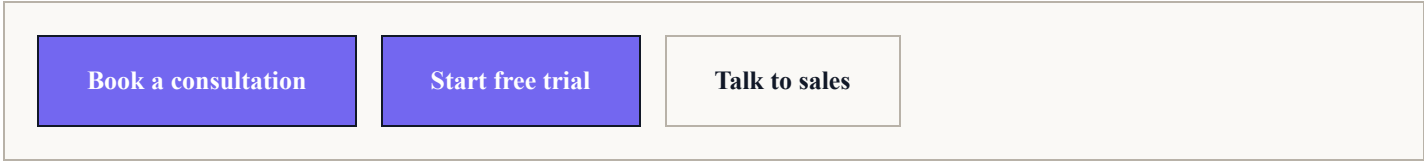

Rules

- ✓ Italic is valid **only** for block quotes / testimonials (Lora family only).
- ✓ Uppercase is valid **only** for eyebrows and plan/card tier labels.
- ✓ Weight 900 is valid **only** for the plan price display number; weight 800 only for secondary (add-on) price numbers.
- ✓ Never use em dashes in any copy. No decorative quotation-mark characters in testimonials.

03 Buttons & CTAs

Every CTA is either **primary** (filled indigo) or **secondary** (ghost / outlined). In any two-CTA group: exactly one primary, one secondary. The secondary is always ghost — chosen by background, not by action type. **No button ever carries an arrow** (arrows belong only to inline text links).

ON LIGHT BACKGROUNDS

btn--hero (primary, hero + bottom CTA) · btn--primary (standard primary) · btn--ghost (secondary: transparent fill, #111827 text, 1.5px #B8B2A8 tan border → hover fills #F0EDE6, border goes #111827)

ON DARK BACKGROUNDS

btn--ghost-light is the secondary on dark sections: transparent fill, white text, white 40% border → 70% on hover.

VARIANT	ROLE	WHERE
btn--hero	Primary	Hero + bottom CTA positions
btn--primary	Primary	Inline / mid-page / featured pricing card
btn--ghost	Secondary (light bg)	The secondary action in a pair on a light bg
btn--ghost-light	Secondary (dark bg)	The secondary action in a pair on a dark bg

Consistent sizing: a primary button is the same size whether it stands alone or sits in a button group. A lone primary is never larger than a paired one. **Pricing pattern:** the featured ("Most Popular") plan uses the filled primary; every other plan CTA is a ghost secondary — even when the action is "Try free for 7 days." Shape: all buttons are square (no radius), no shadow, 1.5px border, hover lifts translateY(-1px).

04 Icons

Library: **Lucide** — inline SVG only. No icon fonts, no emoji. SVG sized 22×22 inside a 44×44 container. Within any section the tint rotates so no two adjacent icons share a color.

Indigo
stroke #7367F0
bg rgba(115,103,240,.12)

Pink
stroke #EE55FF
bg rgba(238,85,255,.12)

Lavender
stroke #A78BFA
bg rgba(167,139,250,.18)

Rotation order: **Indigo** → **Pink** → **Lavender**, repeating.

05 Spacing & Layout

SPACING SCALE (4PX BASE)

--sp1	4px	
--sp2	8px	
--sp3	12px	
--sp4	16px	
--sp5	24px	
--sp6	32px	
--sp7	48px	

LAYOUT WIDTHS & SECTION PADDING

TOKEN	VALUE	USE
--max-w	1200px	Page container max-width
--w-hero	900px	Hero content column
--w-prose	760px	Long-form text container
--w-tight	560px	Narrow modals / CTAs
--section-y	88px	Standard section vertical padding
--section-y-sm	64px	Compact section padding
--section-y-lg	120px	Spacious section padding

Borders: sections use border-bottom: 1.5px solid #B8B2A8 only. Never add a top border to a section that follows a bordered section — it doubles the line. **Motion:** hover 0.15s · transforms 0.2s · panels 0.3s, all ease.

06 Component Inventory

The approved component blocks. Each has a fixed CSS spec in the master design system doc — audits check that pages use these and nothing custom.

COMPONENT	CLASS	NOTES
Navigation	.nav	Sticky, 64px, white bg, 1.5px #111827 bottom border
Hero (centered CTA)	.hero	Paper-texture bg image, pill + h1 + lead + CTA, proof bar inside
Proof bar	.proof-bar	Infinite logo scroller, grayscale at 55% opacity
Stats strip	.stats-strip	Indigo serif values, vertical dividers
Value props grid	.vp-grid	3-col cards, rotating icon tints, hover lift -2px
Use cases grid	.uc-grid	3-col numbered cards (01, 02...)
How it works	.steps-grid	3 steps, large faded serif numbers, optional image
Testimonial	.tm-wrap	Italic Lora quote, avatar + name + role
Case study hero	.cs-hero	2-col, logo + quote + 4 stat tiles
FAQ accordion	.faq	First item open by default, chevron rotates
Security (dark)	.security	Dark bg image, 2-col cards, badge row
Final CTA (dark)	.final-cta	Pink/dark bg image, overlay, trust badges
Footer	.footer	Logo + links + copyright, top border

Standard page section order

Nav → Hero (proof bar inside) → Stats strip → [demo] → Trust banner → Value props → Use cases → [resource CTA] → Customer results → How it works → Security (dark) → Testimonial → FAQ → Final CTA (dark) → Footer.

07 Design Audit Checklist

Run this against any page. A page passes only if every line is true.

- ✓ **No shadows.** Nothing on the page casts a shadow.
- ✓ **Square corners.** No rounded corners anywhere (cards, buttons, inputs, avatars, images).
- ✓ **Fonts:** Lora for every heading and quote; Inter for everything else. No third typeface.
- ✓ **Headings** use .h1 / .h2 / .h3 classes — no custom font-size-only heading classes.
- ✓ **Colors** all map to a token. No stray hex values outside the palette above.
- ✓ **Background** is warm off-white #FAF9F6 — not pure white #FFFFFF.
- ✓ **Borders** are warm tan #B8B2A8 at 1.5px — not gray #E5E7EB. Bottom-border only on sections.
- ✓ **CTAs:** one primary + one secondary per group; secondary is always ghost; chosen by background.

✓ **Primary size is consistent** — a lone primary is no larger than a paired one.

✓ **No arrows on buttons.** Arrows only on inline .text-link discovery links.

✓ **Icons** are Lucide inline SVG, 22px in a 44px box, tints rotating indigo → pink → lavender.

✓ **Spacing** values sit on the 4px scale (4 / 8 / 12 / 16 / 24 / 32 / 48).

✓ **No em dashes** in any copy. Friction line reads "7-day free trial · Cancel anytime", never "No credit card".
